

Risk Assessment for Orienteering

Risk assessments are concerned with identifying the hazards (i.e. things which might go wrong or cause an accident/injury), evaluating the likelihood of a particular event occurring (i.e. level of risk) and putting measures in place needed to reduce or eliminate the risk.

The Risk Assessment (King George V playing fields, Cottingham Saturday October 3rd 2015)

It is essential that the mitigation column is completed in detail so that the control measures and who is responsible is fully understood in advance of the activity / session / event and that all staff / helpers are fully briefed.

NB: it is not sufficient only to put warnings in preliminary information as there is no way of being sure that all participants will have read them.

Hazard – note under these headings (see suggested examples to consider)	Possible outcome / injury including note on severity and likelihood of occurrence	MitigationWhat control measure?Who is responsible?	
In area to be used (indoor / outdoor): Outdoors			
Slopes	Low risk – low/medium severity	Short but steep slopes in the Cyclo-cross area. They are marked on the map with standard symbols. Only senior courses will use this area. (Resp – Mapper NH)	
Water	Low/medium risk – low/medium severity	There are a number of shallow ditches and streams in the area. These are clearly marked on the map. Competitors will be informed of their existence and instructed that wading across is not permitted. (Responsibility – Organiser NH).	
Wire / ruined fences	Low risk – low/medium severity	All known fences and ruined fences are marked on the map.	
Uneven surfaces on the course Uneven surfaces Car park, etc	Low risk – low/medium severity Low risk – low/medium severity	Competitors aware – all events have uneven surfaces If in car-park, notice posted in final details (Responsibility – Organiser NH)
